

CouchPotato

For more information about this app, you can visit [this link](#).

CouchPotato is now deprecated its is recommended you do not use it and make the transfer to a maintained applications such as radarr

Initial Setup

This guide assumes that this is your first time installing Radarr, and you'll be storing your media locally, saving it to `~/media`.

A setup wizard will assist you in setting up your CouchPotato.

CouchPotato Setup Wizard

- After installation and clicking Connect, enter your credentials. After that, CouchPotato's Setup Wizard will start. Just scroll down the page to continue.
- In General settings, you may leave most of these settings as-is. You can check `Dark Theme` if you prefer.
- For the `What download apps are you using?` section, select the clients you want to use.

It is not recommended to use NON SSL connections as these are far less secure then SSL, which will function in nearly all cases.

Download Client Connection Details

Torrent Clients

Deluge

```
Host: {servername}.usbx.me:{Deluge Daemon Port}
Username: {username}
Password: As configured in UCP under Deluge
Directory: {Leave Blank}
Label: {Optional}
```

rTorrent

Host: `https://{username}.{servername}.usbx.me/RPC2`
Username: `{username}`
Password: As configured in UCP under ruTorrent
Label: `{Optional}`
Directory: `{Leave Blank}`

Transmission

Host: `https://{username}.{servername}.usbx.me/transmission/rpc: 443`
Username: `{username}`
Password: As configured in UCP under Transmission
Directory: `{Leave Blank}`

Usenet Clients

SABnzbd

Host: `https://{username}.{servername}.usbx.me/sabnzbd`
API Key: Generated SABnzbd API Key
Category: `movies`

NZBget

Host: `https://{username}.{servername}.usbx.me/nzbget`
Password: As configured in UCP under NZBGet
Category: `Movies`

- In the `Move & rename the movies after downloading?` section, enable `Rename downloaded movies`. Then, set the following
 - `Keep From:` `empty`
 - `Set To:` to your `media/Movies` folder.
 - `Unrar` : `Checked`
 - `Cleanup` : `Checked`
 - `Delete others` : `Checked`
- Once that's done, and you've installed the extension/grabbed the bookmark, click `I'm ready to start the awesomeness!` to go to the main interface.
