# Doplarr

Doplarr is a Radarr, Sonarr, and Overseerr request bot for Discord. Doplarr can perform requests with either Radarr/Sonarr or Overseerr using your Discord bot application.

## Prerequisites

- Discord account and private server for the bot application
- If using the Radarr/Sonarr request method, then Radarr and/or Sonarr will need to be already installed and with their respective Media Root Folders already configured
- If using the Overseerr request method, then Overseerr will need to be already installed with Radarr and/or Sonarr already configured within Overseerr

### Installation

• From within the User Control Panel, go to the **Installers** tab and find **Doplarr**, click the green **Install** button.

Doplarr
[BETA] An *arr request bot for Discord
Get Discord Bot Token
To get discord bot token, you must follow the steps provided here - <u>Set Up Discord</u> <u>Bot</u>
Discord Bot Token
Enable at least one of the *arr applications:
🗌 Radarr 🔲 Sonarr
Overseerr
One of the *arr application is required to be enabled with Doplarr. Radarr and Sonarr can be selected together but Overseerr doesn't work with Radarr or Sonarr.
Cancel Install

- As shown in the above image, you need to enter your **Discord Bot Token** and enable at least one of the \*arr applications. Continue the guide below for instructions on how to get your **Discord Bot Token**.
- If you want Doplarr to send requests directly to your \*arrs, simply enable Radarr and/or Sonarr only. Radarr/Sonarr must already be installed. **OR** If you want Doplarr to send requests via Overseerr, enable Overseerr. Overseerr must already be installed.
- Once you have entered the **Discord Bot Token** and enabled at least one of the \*arrs. Click the green **Install** button.

#### Jellyseerr

• To add Jellyseerr to Doplarr, execute the following command:

```
app-doplarr install -d <discord_token> -j
```

• However, as Jellyseerr is not officially supported by Doplarr, the installation process is customized, and it might not work as expected. Use at your own risk.

## Setting Up Your Discord Bot Application

• Create a new Discord Application and name it accordingly

DEVELOPER PORTAL	Applications New Application
Applications Teams	Find the perfect feature set for your game in our Game SDK, and sign up for Server Commerce to start selling directly in your serve started by creating a new application. We can't wait to see what you make!
	Sort By: Date Created V Small Small
	My Applications
	You don't have any applications yet, sad face, Click New Application above to get started.

• Click the Bot link on the left side menu and then Add Bot

← Back to Applications	Bot Bring your app to life an Discord with a Bot year. Bo a part of chat in your years' convers and interact with them directly.

- Make sure to open the **ADD TO SERVER** dropdown menu and select the Discord server you want to add your bot to.
- Click **Continue** to authorize and add your bot to your Discord server.
- Once you have invited your Discord Application bot to your server you will see it in your member list, however it will be in the offline state until you install Doplarr using your bot's token

### Installing Doplarr for Overseerr Requests

## Prerequisite for using Overseerr for your Doplarr Discord bot requests

When using Doplarr for Overseerr requests, you will need to first add your primary admin Discord handle USER ID to your Overseer application's settings.

• Navigate to your primary Discord handle's **User Settings** by clicking the cog in the lower left corner next to your Discord handle

#### Sending Commands To Your Doplarr Discord Application Bot

Once you have completed all steps above, and confirmed your Doplarr Discord Application Bot is online within your private Discord server, you can then type out the *i* character to see a list of commands offered by the Doplarr bot to use accordingly.
