

Install C++

This is an unofficial script that is provided for your convenience. The script is provided as-is and may not be updated or maintained by Ultra.cc. Customers are welcome to use and customize unofficial scripts for their unique needs and requirements. Unofficial support may be offered via [Discord](#) only and at the sole discretion of Ultra.cc staff.
Use at your own risk.

This script will install C++ on your Ultra.cc slot. C++ is a general-purpose and objected oriented programming language. It was developed with performance, efficiency, and flexibility of use as its design highlights.

Installation

- Connect to your Ultra.cc slot via SSH, see guide [here](#).
- Once connected, execute the following command:

```
bash <(wget -qO- https://scripts.usbx.me/util/LanguageInstaller/C-Installer/main.sh)
```

- Type **1** and press **ENTER** to confirm the installation.
- Wait for installer to finish.
- Done!

Uninstallation

- Execute the following command:

```
bash <(wget -qO- https://scripts.usbx.me/util/LanguageInstaller/C-Installer/main.sh)
```

- Type **2** and press **ENTER** to proceed with uninstallation.
- Done!
