Install Golang

This script will install Golang on your Ultra.cc slot. Go is an open-source and multipurpose programming language which is fast and efficient.

Installation

- Connect to your Ultra.cc slot via SSH, see guide here.
- Once connected, execute the following command:

```
bash <( wget -qO- https://scripts.usbx.me/util/LanguageInstaller/Golang-installer/main.sh)
```

- Type `install` and press `ENTER` to confirm.
- Next, pick the version you want to install by typing `1`, `2`, `3`, `4` or `5`.
- Press `ENTER` to confirm.
- Done!

Uninstallation

- Execute the following command:

```
bash <( wget -qO- https://scripts.usbx.me/util/LanguageInstaller/Golang-installer/main.sh)
```

- Type `uninstall` and press `ENTER` to proceed with uninstallation
- Press `y` and `ENTER` to confirm.
- Done!
