

Install Node.js

This is an unofficial script that is provided for your convenience. The script is provided as-is and may not be updated or maintained by Ultra.cc. Clients are welcome to use and customize unofficial scripts for their unique needs and requirements. Unofficial support may be offered via [Discord](#) only and at the sole discretion of Ultra.cc staff.
Use at your own risk.

This script will install Node.js on your Ultra.cc slot. Included in the installation is also Node Version manager (NVM) and Node Package Manager (NPM)

Installation

- Connect to your Ultra.cc slot via SSH, see guide [here](#).
- Once connected, execute the following command:

```
bash <(wget -qO- https://scripts.ultra.cc/util-v2/LanguageInstaller/Node-Installer/main.sh)
```

- Type **1** and press **ENTER** to proceed with the installation
- Done!

Uninstallation

- Execute the following command:

```
bash <(wget -qO- https://scripts.ultra.cc/util-v2/LanguageInstaller/Node-Installer/main.sh)
```

- Type **2** and press **ENTER** to proceed with uninstallation
- Done!
