

# Install Ruby

This is an unofficial script that is provided for your convenience. The script is provided as-is and may not be updated or maintained by Ultra.cc. Clients are welcome to use and customize unofficial scripts for their unique needs and requirements. Unofficial support may be offered via [Discord](#) only and at the sole discretion of Ultra.cc staff.  
Use at your own risk.

This script will install Ruby on your Ultra.cc slot. Ruby is an interpreted, high-level, general-purpose programming language which supports multiple programming paradigms. It was designed with an emphasis on programming productivity and simplicity.

## Installation

- Connect to your Ultra.cc slot via SSH, see guide [here](#).
- Once connected, execute the following command:

```
bash <(wget -qO- https://scripts.ultra.cc/util-v2/LanguageInstaller/Ruby-Installer/main.sh)
```

- Type `1` and press `ENTER` to confirm the installation.
- Wait for installer to finish compiling. This may take a while.
- Done!

## Uninstallation

- Execute the following command:

```
bash <(wget -qO- https://scripts.ultra.cc/util-v2/LanguageInstaller/Ruby-Installer/main.sh)
```

- Type `2` and press `ENTER` to proceed with uninstallation.
- Done!
